

## VELVET FRAMED SCREEN

**A screen specially produced for the best picture reproduction. The frame is covered in velvet that prevents any possible disruptive reflections. The screen fabrics reproduce colour and light in a very natural way. We highly recommend this screen to the movie enthusiasts.**

### SCREEN CASSETTE / COLOUR

The screen cassette is made of aluminium and covered in black velvet. The velvet prevents disruptive reflections from the frame.

### BLACK BORDERS

The picture area is surrounded by the 8 cm wide aluminium cassette (covered in velvet).

### SCREEN FABRIC / GAIN

The screen fabric is dull white and made of vinyl. The fabric is elastic and stretched out in the frame. This provides a surface absolutely free from waves. The gain value is 1,0.
